Here's my note

Developing user flows and wireframes: Map out user journeys and create basic visual representations of product layouts and interactions.

Designing interactive prototypes: Build clickable models to test and iterate on design concepts. Conducting usability testing: Observe and analyze how users interact with prototypes or live products to identify areas for improvement.

Please provide 3 learning objectives:

Learn how to gather requirements

conduct user and market research

analyze research, come up with concepts

▸ What majors are preferred for this position? Choose up to 4.

▸ What additional application materials will you require?

Additional Qualifications

Are there any additional qualifications or parameters you would like to set for your Interns? e.g. Specific major, previous work experience, etc.
